Caveats: NONE

All,

On or about October 3, 2012 you should have received a package from Weston Solutions, Inc. That package contained responses to the comment letters we received from your agencies relating to our pending permit application for the Southport Marine Terminal on the Delaware River in Philadelphia, PA. Due to the volume of materials included with their response, the package you received contained a CD rather than paper copies of all of the materials. If you are unable to view the CD, please let me know. Our file number for this application is: CENAP-OP-R-2009-933-1. Please review these comments and respond to our office within 30 days. If you have any questions or would like to see the project site or proposed mitigation site again, let me know and I will coordinate that effort.

Thanks

Ed Bonner

Caveats: NONE

Please refer to the email message below requesting you comments. A package was forwarded to you on or about October 3, 2012. That package contained the applicant responses to the comments you forwarded to our office in response to our public notice. I believe the applicant's responses have addressed all of your comments and/or questions. I would like to finalize the permit document for this project. However, it should be noted that we have had on-going discussions with the applicant concerning the mitigation plan at Jacks Marina. The mitigation plan is being modified today based upon comments and discussions at a site meeting yesterday. The revised mitigation plan will provide for additional tidal wetland creation at the mitigation site measuring approximately 3.7 acres. This additional acreage of wetland habitat at Jacks Marina was accomplished through the reduction of red bellied turtle nesting areas and the elimination/reduction of access trails through the forested upland buffer areas. In the mitigation portion of the package you received there is a drawing labeled as figure 5 Habitat and Grading Plan Jacks Marina. That plan can be utilized for a reference to this message. Once I receive that revised plan I will forward a copy to you for your information.

Since we have not had any further comments and/or questions with regard to the applicant's submittal I assume that you have no further comments or objections to the issuance of a permit for this project. If my assumption is correct please acknowledge. If you have any questions or comments, please submit them to me before tomorrow afternoon.

This is a follow-up to my previous message. I did not properly proof read my message prior to sending it, In particular my second paragraph should read as follows.

"Since we have not had any further comments and/or questions with regard to the applicant's submittal I assume that you have no objections to the issuance of a permit for this project. If my assumption is correct please acknowledge. If you have any questions or comments, please submit them to me before tomorrow afternoon."
